Ultrasonics

Index to Volume 31 (1993)

Number 1 (January) pp 1–72
Number 2 (March) pp 73–144
Number 3 (May) pp 145–216
Number 4 (July) pp 217–304
Number 5 (September) pp 305–384
Number 6 (November) pp 385–472

Article index

Number 1

Diffraction coefficients for flat-bottomed holes from 3-D finite difference calculations
J.A.G. Temple 3
Diagnostic measurements in capacitive transducers
H. Carr and C. Wykes 13
Transducer design for a correlation log
B. Woodward, S.K. Hole and W. Forsythe 21
Acoustic non-linearity method for estimating the ratio of bound to free water of biological media
Y. Yang and F. Dunn 35
Effect of ultrasound pulse width on cavitation in a small-size reverberation field
W. Shuang-wei, F. Ruo, X. Jian-yi and S. Qun 39
Ultrasonic leaky waves for non-destructive interface characterization
T.M. Hsieh and M. Rosen 45
Integrating NDE-derived engineering properties with finite element analysis for structural composite materials
R.A. Kline, G. Cruse, A.G. Striz and E.I. Madaras 53
Ultrasonic fatigue testing equipment and new procedures for complex material evaluation
A. Puškár 61

Number 2

A review of the physical properties and biological effects of the high amplitude acoustic fields used in extracorporeal lithotripsy
A.J. Coleman and J.E. Saunders 75
Non-linear SAW reflection: experimental evidence and NDE applications
I.Yu. Solodiv, A.F. Asainov and Ko Sel Len 91
Lamb-wave tomography using non-contact transduction
D.A. Hutchins, D.P. Jansen and C. Edwards 97
An automatic stabilization system for a confocal Fabry-Perot interferometer used in the detection of laser-generated ultrasound
Q. Shan, S.M. Jawad and R.J. Dewhurst 105
Two approaches to motion analysis of the ultrasound image sequence of carotid atheromatous plaque
K.L. Chan 117
A system for the reconstruction of acoustic impedance with high resolution
J. Bai, W. Qi and L. Yu 125

Number 3

Ultrasonic propagation through hydrating cements
C.M. Sayers and R.L. Grenfell 147
Ultrasonic evaluation of creep damage in steel
T. Gómez Alvarez-Arenas, E. Riera-Franco de Sarabia and J.A. Gallego-Juárez 155
Scattering of acoustic waves by the rough surface of an elastic solid
M. Blakemore 161
Ultrasound scattering properties of Albunex microspheres
N. de Jong and L. Hoff 175
Stress dependence of the acoustic properties of Zr-2.5 wt% Nb alloy
T. Chow, D.A. Hutchins, M.D.C. Moles and R.P. Young 183
Ultrasonic velocity and attenuation of glass ballotini in viscous and viscoelastic fluids
G.H. Meeten and N.E. Sherman 193
A signal regeneration technique for long-range propagation of dispersive Lamb waves
D.N. Alleyne, T.P. Pialucha and P. Cawley 201
Change of temporal shape of pulsed ultrasonic waveform by the reflection phenomenon
Y. Jayet and J.C. Baboux 205

Number 4

A model for the effects of inclusions on ultrasonic inspection
J.A. Ogilvy 219
Characterization of flaws using the poles and zeros of the transfer function of the corresponding ultrasonic system
N. Mercier, J.F. de Belleval and P. Lanceleur 229
Delamination sizing in composite materials using a Gauss–Hermite beam model
A. Minachi, F.J. Margetan and D.K. Hsu 237
Ultrasonic measurement of longitudinal and shear velocities of materials at elevated temperatures
D.K. Mak and J. Gauthier 245
Laser-induced piezoexcitation of acoustic shear horizontal waveguide modes
V. Gusev and M. Kouznetsov 251
Optical diffraction tomography applied to airborne ultrasound
A. Holm and H.W. Persson 259
Fibre-optic probe hydrophone for ultrasonic and shock-wave measurements in water
J. Staudenraus and W. Eisenmenger 267
High frequency method for torsion fatigue testing
H.R. Meyer, S.E. Stanzl-Tschegg and E.K. Tschegg 275
Ultrasound as a probe for assessing the internal pressure and molar cohesive energy of a liquid system: a new model
C.V. Suryanarayana 281

Number 5

On ultrasound light diffraction
R. Reibold and P. Kwiek 307
Photoacoustic imaging of ion-implanted semiconductor samples
J. Bodzenta, B. Pustelna and Z. Kleszczewski 315
The acousto-optic interaction in the interferometric measurement of ultrasonic transducer surface motion
D.R. Bacon, R.C. Chivers and J.N. Som 321
Acousto-optics of semiconductor crystals and superlattices in resonance conditions
P. Renosi and J. Sapriel 327
Anisotropic light diffraction on ultrasound in a tellurium dioxide single crystal
V.B. Voloshinov 333
Collinear interaction of Gaussian acoustic and light beams
V.N. Parygin and I.N. Zhmakin 339
The present status of ultrasonic imaging in medicine
P.N.T. Wells 345
Recent activity in ultrasonic tomography
H.W. Jones 353

The present status of ultrasonic imaging in medicine
P.N.T. Wells 345
Recent activity in ultrasonic tomography
H.W. Jones 353

Scanning-acoustic microscopy
B.T. Khuri-Yakub 361
Ultrasonic C-scan imaging for material characterization
G.A. Gordon, S. Canumalla and B.R. Tittman 373

Number 6

Non-contact optical fibre phased array generation of ultrasound for non-destructive evaluation of materials and processes
J. Yang, N. DeRidder, C. Ume and J. Jarzynski 387
Detection limits for single small flaws and groups of flaws when using focussed ultrasonic transducers
K. Shiloh, L.J. Bond and A.K. Som 395
Characterization of ultrasonic imaging systems using transfer functions
U.W. Lee and L.J. Bond 405
The optimum bandwidth of chirp signals in ultrasonic applications
M. Pollakowski, H. Ermert, L. von Bernus and T. Schmeidl 417
Reversing multistrip coupler
E. Danicki 421
A laser beam deflection technique for the quantitative detection of ultrasonic Lamb waves
L. Noui and R.J. Dewhurst 425
Absorption and velocity dispersion due to crystallization and melting of emulsion droplets
D.J. McClements, M.J.W. Povey and E. Dickinson 433
The 10 MHz ultrasonic near-field: calculations, hydrophone and optical diffraction tomography measurements
R. Eriksson, A. Holm, M. Landeborg, H.W. Persson and K. Lindström 439
Ultrasonic absorption frequency dependence of two widely used anti-cancer drugs: doxorubicin and daunorubicin
D.B. Tata, G. Hahn and F. Dunn 447
The use of dosimeters to measure radical production in aqueous sonochemical systems
G.J. Price and E.J. Lenz 451
Highly efficient sonochemical reaction with a switched spiral field
K. Kawabata and S. Umemura 457
The effect of fluorocarbon gases on sonoluminescence: a failure of the electrical hypothesis
K.S. Suslick and K.A. Kemper 463
